

BlockHeaven Rank Setup Guide

Prerequisites

Before creating ranks, ensure the following plugins are installed:

- LuckPerms
- DiscordSRV (optional for Discord integration)

Restart the server after installation.

Step 1: Create Rank Groups

Run these commands in the server console:

```
/lp creategroup chicken  
/lp creategroup wolf  
/lp creategroup bee  
/lp creategroup allay  
/lp creategroup creeper  
/lp creategroup enderdragon
```

Step 2: Set Rank Prefixes

Example prefixes:

```
/lp group chicken meta setprefix 100 "&f[Chicken] "  
/lp group wolf meta setprefix 90 "&7[Wolf] "  
/lp group bee meta setprefix 80 "&e[Bee] "  
/lp group allay meta setprefix 70 "&b[Allay] "  
/lp group creeper meta setprefix 60 "&a[Creeper] "  
/lp group enderdragon meta setprefix 50 "&5[EnderDragon] "
```

Lower numbers = higher priority.

Step 3: Create Rank Inheritance

This prevents having to re-add permissions for every rank.

```
Wolf inherits Chicken  
Bee inherits Wolf  
Allay inherits Bee  
Creeper inherits Allay  
Ender Dragon inherits Creeper
```

Commands:

```
/lp group wolf parent add chicken  
/lp group bee parent add wolf  
/lp group allay parent add bee  
/lp group creeper parent add allay  
/lp group enderdragon parent add creeper
```

Step 4: Add Permissions

Example:

Chicken:

```
/lp group chicken permission set essentials.sethome true  
/lp group chicken permission set essentials.home true
```

Wolf:

```
/lp group wolf permission set essentials.sethome.multiple.3 true
```

Bee:

```
/lp group bee permission set essentials.sethome.multiple.5 true
```

Continue adding permissions according to rank benefits.

Step 5: Grant A Rank

Example:

```
/lp user Steve parent add allay
```

Step 6: Remove A Rank

Example:

```
/lp user Steve parent remove allay
```

Step 7: Check A User's Rank

```
/lp user Steve info
```

Step 8: Verify Prefixes

Join the server and check:

```
[Chicken] Player  
[Wolf] Player  
[Bee] Player  
[Allay] Player  
[Creeper] Player  
[EnderDragon] Player
```

appear correctly.

Future Automation

Once the BlockHeaven website store is connected:

Discord Login → Razorpay Payment → Discord Role → LuckPerms Rank

can be granted automatically without manual commands.

Until then, use the manual commands above to grant purchased ranks.
